ABOUT ILECS:

International Law and Ethics Conference Series
(ILECS) is an ongoing project, a unique endeavor, now in its eight year. ILECS uses a dialogic-comparative model consisting of a conference each June at Belgrade University and a follow-up conference in the US. This two-part strategy has given leading moral, legal, and political philosophers – and increasingly, scholars from other disciplines – from the US and Western Europe the opportunity to meet with their Eastern European counterparts to discuss issues of global importance, many of which have been generated by the events in the region.

This event has been funded in part by the Serbian Ministry
of Science
